MobileBytes to Heartland Restaurant Conversion

Rev. 07/2019

Table of Contents

Overview

Listed below are step by step instructions that should be followed in order to successfully convert a MobileBytes site to Heartland Restaurant.
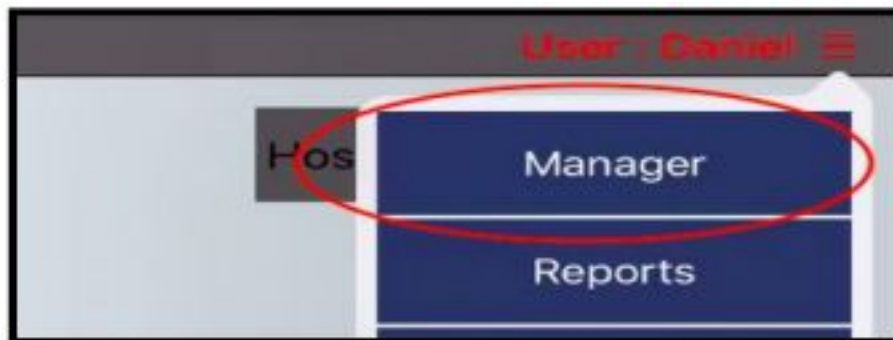

Pre Configuration

Step 1. Install Heartland Restaurant from the App Store

Step 2. Launch MB POS

Step 3. Make sure the iPad is synced with no pending uploads

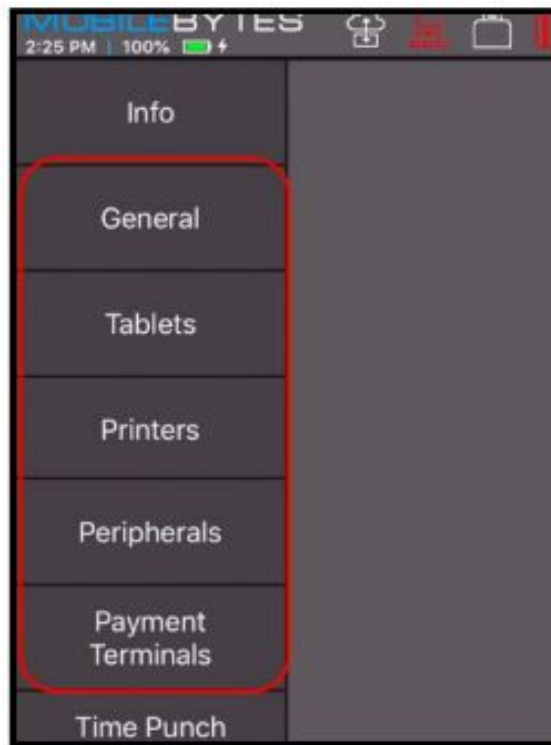

Document iPad specific settings

Now check in each of these settings to mimic for Heartland Restaurant.

A screenshot may also be useful to capture each setting's configuration. To complete a screenshot use the Home button and Wake/Sleep button at the same time on the iPad.

- All setting under General
- Ticket Prefix under Tablets
- All settings under Printers
- All settings under Peripherals
- All settings under Payment Terminals

Duplicate iPad specific settings in Heartland Restaurant

Launch Heartland Restaurant

Match the previous iPad specific settings

- All setting under General
- Ticket Prefix under Tablets
- All settings under Printers
- All settings under Peripherals
- All settings under Payment Terminals

Verify Heartland Restaurant behavior

- Test printing each kitchen receipt
- All settings under Peripherals
- Test printing guest receipt
- Test any attached peripherals
- Test PAX communication if applicable

Uninstall MB POS

New Heartland Restaurant Portal

Verify and/or add Heartland URL (hrpos.heartland.us) under web content/privacy restrictions
