Overview

This article contains explanations for the following updates:

‣ Admin Console

If you have questions regarding the updates described in this document, please contact Heartland Mobile Manager Support by email at hmm@heartland.us .

What's New?

The following release notes detail the updates we have included in this release.

Admin Console

HMMC-10176 Controls Added for Multi-factor Authentication Resets

We have added controls to the Admin Console that enable you to reset a store owner's multi-factor authentication factor. In the Store Owner settings screen, in the MFA Factor area, we have added the Reset MFA factor button. If you click this button, the program will reset the store owner's current MFA factor. (If the store owner is not yet set up for MFA, the program will display "Not Setup" in this area.)
