

# Heartland Restaurant Essentials Getting Started Guide

## Pre Setup Checklist

Please take the time to ensure the following things are addressed and prepared prior to installation and training.

1. Confirm equipment was delivered intact (No major damage to the box/es). Open the packages and make sure all equipment is included with all applicable cables. **Do not** dispose of any packaging prior to setup and training being completed.
2. Have your high speed internet connection setup and ready (See Network Best Practices section).
3. Have a Wifi connection.
4. Know your wifi network login credentials.
5. Have direct ethernet connection to router or switch (if applicable, for kitchen and label printers).
6. Ensure access to power preferably with surge protection.
7. Have a PC/Laptop for easier navigation of some setup features.
8. Gather Ethernet cord, Screwdriver, Router/Modem reset tool (Paperclip).
9. Areas where equipment is located should be clean and free of clutter for proper usage and safety. All wires should be able to be tucked away from accidental disconnections or becoming tripping hazards.
